Subject: **SOP FOR THE DISPOSAL OF WASTE MATERIAL**

Reference to the subject cited above and to state that the proper disposal of waste is critical due to the fact that waste material can be hazardous and contaminate the environment if not handle properly. If food waste was not properly dispose off, it can create significant health problems and pollute the environment. It also provides breeding sites for insects, pest, snakes and rates. That can increase the chance of disease transmission. It may also pollute the water, land and air. So the proper disposal of food waste is really very important.

Therefore, all of you are directed to follow the following procedure while disposing the food waste / contaminated food.

1. Don't throw the solid food in river, stream or any other waste source.
2. Dump the solid waste (Food) into proper dig.
3. Don't discard the rancid Oil/Gee off-grade or rancid oil is being treated as a commodity that can be sold to biodiesel dealer rather than discarded as waste.
4. You can dispose the milk only in running stream or field away from population.
5. Always dispose of the waste away from city / population.

Dr. Abdul Sattar Shah
Director Technical
KP Food Safety & Halal Food Authority
