Pops Testing & Enforcement Drive Report
(10 November - 19 December 2025)

INTRODUCTION

Ensuring the safety, purity, and quality of commonly consumed food products remains a key priority for the Khyber Pakhtunkhwa Food Safety & Halal Food Authority (KPFS&HFA). In line with its mandate under the Khyber Pakhtunkhwa Food Safety & Halal Food Authority Act, 2014 (amended 2017), the Authority conducted a province-wide Pops Testing and Enforcement Drive from **10 November to 19 December 2025**. The campaign aimed to assess the compliance of both branded and unbranded pops with prescribed food safety and quality standards, with particular emphasis on hygiene, contamination, use of permitted additives, and labeling authenticity.

The initiative was led by the Provincial Food Testing Laboratory & Centre for Research (PFTLCR), Hayatabad, Peshawar, in close coordination with KPFS&HFA's regional offices and enforcement wings. During the drive, a total of 156 samples of pops were collected systematically from manufacturing units, storage facilities, and retail outlets across the province. Out of these, 115 samples were declared compliant, while 41 samples failed to meet the required safety and quality standards.

All collected samples underwent detailed physio-chemical analysis to detect the presence of non-permitted colorants, excessive additives, microbial contamination, and other indicators of poor hygiene and substandard manufacturing practices.

Based on the laboratory findings, the Authority initiated strict regulatory and enforcement actions against non-compliant products in accordance with applicable laws. The drive not only helped identify unsafe and substandard pops but also played a vital role in raising awareness among manufacturers and vendors regarding adherence to national food safety standards and hygienic production practices.

The results of the campaign provided valuable insights into the overall safety and quality status of pops being sold in Khyber Pakhtunkhwa. These findings will further support KPFS&HFA's evidence-based regulatory approach, strengthen future enforcement strategies, and contribute to the Authority's ongoing efforts to protect public health by ensuring that consumers have access to safe, hygienic, and quality assured products.

GOVERNMENT OF KHYBER PAKHTUNKHWA FOOD SAFETY & HALAL FOOD AUTHORITY

KPFS & HFA Sampling Methodology	
No. of Brands Collected	156
No. of Cities Targeted	08
Composition of Sampling Team	Assistant Director Food Safety and Food Safety Officer
Sampling Procedures	<ul style="list-style-type: none"> • AD FS Lead district inspection teams. • Collected samples from manufacturing unit, whosale dealer and distributors as per SOP. • Recorded plant hygiene, packaging compliance, and industry data. • Conducted on-ground inspections of Manufacturing unit, distributors, and wholesaler. • Verify license status, batch numbers, expiry dates, and labeling. • Ensure chain-of-custody for samples transported to lab. • Prepare photographic & video evidence.
Transparency: This three-sample system ensures traceability, impartiality, and the right to appeal, thereby upholding due process and confidence in enforcement actions under the KP Food Safety & Halal Food Authority Act, 2014.	Sample No.1.Handed over to the industry management at the time of collection.
	Sample No. 2. Retained for future record.
	Sample No.3 Used for Laboratory (microbiological and Physico-chemical analysis)

SUMMARY

The Khyber Pakhtunkhwa Food Safety & Halal Food Authority (KPFS&HFA) conducted a comprehensive province-wide pops testing and enforcement drive aimed at ensuring the safety and compliance of pops. Total 156 Samples were collected across the province.

POV: Per Oxide Value

FFF: Free Fatty Acids

CONCLUSIONS

The Pops Testing & Enforcement Drive successfully identified critical gaps in compliance, hygiene, and manufacturing practices within the pops industry of Khyber Pakhtunkhwa. While several units demonstrated improved adherence to food safety regulations, the detection of poor hygienic conditions in a significant proportion of samples highlights the urgent need for strict process control, sanitation, and ingredient quality assurance across production and distribution facilities.

The Authority recommends the following actions:

1. **Mandatory Re-Testing:** Non-compliant pops manufacturing units must undergo verification testing by PFTLCR before resuming production and sale.
2. **Strengthened Monitoring:** Continuous random sampling, market surveillance, and surprise inspections at manufacturing, storage, and retail levels to ensure sustained compliance.
3. **Capacity Building:** Technical training for industry personnel on Good Manufacturing Practices (GMP), hygienic handling, and temperature control, along with awareness of HACCP-based food safety systems.
4. **Public Disclosure:** Regular publication of compliant and non-compliant pops brands to enhance transparency and consumer awareness.
5. **Collaborative Enforcement:** Strengthened coordination between KPFS&HFA, district administrations, and local enforcement agencies to ensure timely product recalls, penalties, and legal action against violators.

Through continued vigilance, scientific oversight, and active stakeholder engagement, KPFS&HFA reaffirms its commitment to safeguarding public health by ensuring the availability of safe, hygienic, and quality assured pops across Khyber Pakhtunkhwa.
